

BUGSBY

1924 Kissel Speedster Model 6-55 “Gold Bug”

Lynn & Jeanne Kissel

Livermore, California

16th Annual LLESA Vintage Vehicle Show

September 15, 2005

The Kissel is a unique and increasingly rare piece of automotive history – less than 150 exist today for all models and years!

- Founded by Louis Kissel and Sons, from 1906 to 1930 Kissel hand produced about 35,000 semi-custom automobiles in Hartford, Wisconsin
- Never a large producer, sales of Kissel cars depended on the quality and custom-built appearance of its vehicles.
- Kissel sold 2,123 vehicles in 1923, 803 in 1924

1908 Kissel Kar Model II Touring

Of all the models, the Speedster model made the biggest historical impression – less than THIRTY are left today!

- First introduced in 1918 as the Kissel Kar Silver Special Speedster, the “Gold Bug” was a sporty roadster that achieved significant notoriety
- “Kissel chrome yellow” (a brighter yellow than the car shown here) was a very popular color for the Speedster
 - Known by the nickname “Gold Bug” with the general public, this was never an official name for the car
- The 1923-28 Model 6-55 used Kissel’s own long-stroke, L-head six-cylinder engine that they had been perfecting since 1915 – it was used through 1928

1923 Kissel Speedster
Model 6-55 “Gold Bug”

The Kissel Speedster was seen in films and was owned by a number of celebrities

- Amelia Earhart owned a 1922 Gold Bug that she called the “Yellow Peril,” making national headlines for driving from LA to Boston with her mother in 1925 – a difficult and uncommon practice at that time
- There were other famous owners of the Gold Bug included entertainer Al Jolson, auto racer Ralph De Palma, boxer Jack Dempsey, and comedian Fatty Arbuckle

In the movie “The Eddy Duchin Story” (1956)

“A 1925 Kissel Speedster in fine condition is easily worth \$50,000 or more,” 1998 Concours d’Elegance

- This blue 1925 Kissel Speedster sold at auction in 2000 for \$116,600
 - Class winner 1999 Pebble Beach Concours d’Elegance
 - Complete documentation of 75 year history of this car
 - Completed 52 mile tour at Pebble Beach 1999 with no problems
- At an Arizona auction in 2003, a 1920 Kissel Speedster sold for \$68,200
- This yellow 1920 Kissel Speedster is currently for sale in St. Louis
 - Original asking price of \$115,000, has been reduced to \$97,500

Original photographs, Kissel literature, other owners offer guidance for restoration details

***BUGSBY* was purchased from Bill Trollope, Sydney, Australia**

- *BUGSBY* was “discovered” by Lynn in early morning hours of April 13, 2005 – offered for sale on the Internet
- Seemingly endless email exchanges and phone calls result in signed sales agreement on June 3 (51 days)
- Car is shipped by cargo container on the Kapitan Maslov, a Russian container ship – sails from Sydney June 18 (66 days), docks at Oakland July 13 (96 days)
- Lynn takes possession of *BUGSBY* on July 25 (103 days)

Bugsby as owned by Bill Trollope in Sydney, circa April, 2005

Bugsby arrives at its new Livermore home July 25, 2005

A Florin on the flywheel? An Edison in the head? Lynn finds “Easter Eggs” in the Kissel.

- It came as a big surprise when Lynn found a silver Australia Florin (2 Shilling) coin soldered to a flywheel cover plate
 - Issued to commemorate visit of Elizabeth II to Australia
 - 1953 or 1954, this coin caused controversy due to missing religious title F:D: (Defender of the Faith)
- Another surprise was the find of a single Edison spark plug in with the other five Champions

Freshening of Bugsby is the current agenda

- Clean oil pan
- Refit brakes
- New hoses, clamps
- Change all lubricants (rear differential, transmission, wheel bearings, chassis fittings, engine grease cups, repack fan bearing)
- Polish nickel bright work

BEFORE

AFTER

BEFORE

AFTER

Several near-term restoration goals will keep Lynn busy and bank account empty for awhile

- Dashboard instruments (eBay)
 - Speedometer not working
 - Clock not historically correct
- Fabrication of new top (Auburn)
 - Plans obtained from Kissel Kar Klub Prez
- Restore missing shocks
 - Shocks located in Salt Lake City, home of 100-point 1925 Kissel Speedster
- Restore original oil cups on chassis
- Restore vacuum fuel system
- Convert to four-wheel hydraulic brakes
 - Opportunity to add small (BMW motorcycle, Honda Civic?) disks brakes inside drums
